All courses are 1 course equivalent unless otherwise indicated on the right.

**Major** requirements.

**General education** requirements (9 courses)

(F) = offered in fall semester only. (S) = offered in spring semester only.

***Taking the 5 upper level required electives in Humanities/Social Sciences and Science/Math is very flexible and does not need to adhere to the rigid schedule implied above. Just make sure you have prerequisite classes (100 level) done early so you can move on to upper-level electives. Work closely with an advisor to determine which electives best suit your interests, abilities, and goals.***
